

# EduFix

*Restoring dignity to public education in Northern Nigeria*

# Problem Statement

## **Crumbling Learning Environments**

Over 70% of public schools suffer from broken classrooms, unusable toilets, and lack of basic learning materials.

## **Unqualified and Underprepared Teachers**

40–50% of teachers lack proper training and teach primarily in Hausa, limiting students' academic performance and future opportunities..

## **No System for Visibility or Accountability**

The absence of a centralized reporting system leads to misallocation of resources and neglect of critical public school needs

## **Community Reporting Platform**

A mobile and web app for parents, students, and teachers to report school needs using text, photos, or voice notes

## **Teacher Training & Bilingual Support**

Partnering with NGOs and education boards to train teachers, promote Hausa-English instruction, and distribute teaching kits

## **Real-Time Data for Smarter Interventions**

Using data analytics to help government and donors prioritize urgent needs and measure the impact of interventions

**Our  
Solution &  
What  
Makes It  
Unique**

# Why It Matters

Poor learning conditions  
lower student attendance,  
performance, and future  
opportunities

Unqualified teaching  
limits students'  
ability to compete at  
national and global  
levels

Communities remain  
disempowered due to  
lack of visibility and  
coordination

# Why Us

Deep understanding of  
local education challenges  
and cultural context

Strong ties to local  
schools, youth  
groups, and  
development  
networks

Passionate team  
committed to solving  
problems that directly  
affect underserved  
students

## Step 1: Community Reporting

- Parents, teachers, and students use our mobile app or SMS to report school needs
- Photos, voice notes in Hausa/English, and location data are captured automatically

## Step 2: Data Processing & Verification

- Our system categorizes reports (infrastructure, teaching materials, personnel needs)
- Local volunteers and community leaders help verify urgent cases

## Step 3: Stakeholder Matching

- Platform connects verified needs with appropriate responders (government agencies, NGOs, donors)
- Real-time dashboard shows funding gaps and intervention opportunities

## Step 4: Impact Tracking

- Progress updates shared with community via SMS and local radio
- Before/after documentation builds accountability and transparency

# How It Works

# What's Next

- Leverage exposure from the KASITDA Hackathon to build our Minimum Viable Product (MVP).
- Pilot with 5-10 schools in Kano to test and refine the platform.
- Build partnerships with State Universal Basic Education Board (SUBEB) and key NGOs.
- Prepare for broader rollout across Northern Nigeria through strategic alliances.

# Target Market

- **Primary Users:** Parents, students, teachers in public schools across Northern Nigeria.
- **Key Beneficiaries:** State education ministries, development NGOs, community leaders, donors, and advocacy groups.
- **Geographic Focus:** Initial rollout in Kano State, expanding to Kaduna, Katsina, and Jigawa.

# The Team

**Muhammed Lawan**

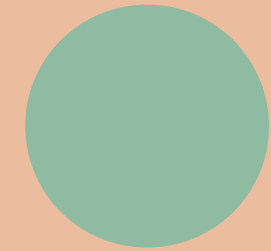

Founder/ Chief Technology Officer

**Abubakar Sadiq**

Chief Executive Officer

**Mary Sokoh**

Chief Product Officer

# THANKS

YOU

Together, we can restore dignity to education in Northern Nigeria.
