## Step 1: Community Reporting

- Parents, teachers, and students use our mobile app or SMS to report school needs
- Photos, voice notes in Hausa/English, and location data are captured automatically

## Step 2: Data Processing & Verification

- Our system categorizes reports (infrastructure, teaching materials, personnel needs)
- Local volunteers and community leaders help verify urgent cases

## Step 3: Stakeholder Matching

- Platform connects verified needs with appropriate responders (government agencies, NGOs, donors)
- Real-time dashboard shows funding gaps and intervention opportunities

## Step 4: Impact Tracking

- Progress updates shared with community via SMS and local radio
- Before/after documentation builds accountability and transparency

# How It Works
